## Notes

Most significantly stressed: Thyroid & Thymus, Spleen, Gallbladder

We scan 58 points to create the energetic system performance. There are a number of systems in which energetic stress was found as you can see from the chart above. In addition to the three most significantly stressed points listed above, the following points of the body are also driving some of these systems down: **Pituitary & Pineal Glands, Sinuses, Joints, Hypothalamus, Adrenal Glands, Throat & Tonsils, Skin, Stomach, Small Intestine, Liver, and Cellular Metabolism.**

## Energetic Toxins

You were scanned against resonating heavy metals, bacteria, viruses, molds, parasites, and chemicals. Below are those that were found, energetic in nature, which simply means there was a match to the bioenergetic pattern of that category. **These are resonating toxins, meaning an energetic exposure to that toxin pattern. Please do not interpret this as a diagnosis or as medical advice.**

### Bacteria

- A resonating bacteria  
often transmitted by ticks,  
fleas, or mosquitos.
- A resonating bacteria  
often transmitted from  
person to person, or  
through droplets in the air  
when an infected person  
coughs or sneezes.

## Chemicals

- A resonating chemical that may be found in everyday items such as food & supplements, materials for constructing, fabrics, detergents, plastics, cosmetics, and fragrances.

  - Low Testosterone  
A steroid hormone found in the androgen group that accelerates growth in tissues on which it acts, stimulates blood flow, and affects many metabolic activities.
  - Low DHEA  
A natural steroid and precursor hormone produced by the adrenal glands.
